“America’s Beauty Spot”

Our Beautiful Location

HOLLYCROFT GARDENS, where the beautiful marine view of shore line scenery is probably the finest in the United States, is located at **Shore Acres**, that very fertile beauty spot on the Peninsula section of the **Narrows** near **Tacoma, Wash.**, about a mile south of the entrance to **Gig Harbor**, our **Post Office Address**.

PLANTS OFFERED in this price list are all grown under our personal supervision and may be considered the best money can buy.

PLANTING:—Ornamentals, Evergreens, Deciduous Trees, Shrubs, Perennial Plants, etc, in the Puget Sound country, may be planted at any time in the fall after the rainy season commences, and continued through the winter till May 1st.

But when possible transplant in the fall, it is much easier for plants to take hold of the new soil and plants will be more vigorous and easier to take care of the first year.

CARE IN PLANTING—Dig the soil about 2 feet deep, if any sod or leaves are at hand, use a good layer of them at the bottom of hole, firm the soil around the roots when planting; water plants thoroughly after planting.

TERMS OF SALE

TERMS—CASH.

PRICES are understood net at **HOLLYCROFT GARDENS**.

PACKING—All orders are carefully packed at prices listed.

PARCEL POST shipments, the amount of postage should be added to prices listed.

MISTAKES: Like all human beings we are apt to make mistakes, and if an error occurs, we will consider it a favor to be notified at once so we can rectify the oversight.

OUR AIM is to have satisfied customers and give everyone a square deal and we hope those who have not yet bought from us, to favor us with a trial order.

IMPORTANT

Prices herein listed are for good healthy, medium size stock. In almost any variety we have larger and smaller sizes than the ones listed and prices for same will be made accordingly.

**ADDRESS: HOLLYCROFT GARDENS,
SHORE ACRES, GIG HARBOR, WASH.,
P. H. PEYRAN CO.**

English Holly, (*Ilex Aquifolium*), is at its best when 100 years old. Plant one for your father's birthday, hoping he will live as long as the holly tree.

CHRISTMAS HOLLY

We are extensive growers of Cultivated English Holly, (*Ilex Aquifolium*), and have the largest grove of these very beautiful green leaved berried trees in the United States.

SAY IT WITH XMAS HOLLY

We will mail for you by insured Parcel Post, to any part of the United States, in strong cartons, selected beautiful Xmas Holly sprays, the very best that grows.

We will help solve your Christmas problems for you.

Just mail us the address, inclose your Xmas Greeting card, pin the money order or your check to your order and we do the rest.

Every carton attractively packed and guaranteed to reach its destination in good condition.

Why not send a large carton of Xmas Holly to your church or your local hospital and a smaller carton to your friends for Christmas Decoration.

Everybody likes a bit of Holly at Christmas.

CHRISTMAS HOLLY

We cut, pack, and promptly mail the same day, in strong cartons, the following popular size packages of our High Grade Cultivated English Holly Sprays to any part of the United States.

\$1.00 size carton add 35 cts. for postage.

\$1.50 size carton add 50 cts for postage

Golden Queen Holly,. (*Ilex Aquifolium Aureore-*
gina) Live to a great age. Plant one for your daugh-
ter for her birthday, hoping she will live to the age
of this holly.

A SMALL INVESTMENT *easy work* SURE PROFIT!

The Aristocrat of ...Evergreens

Evergreen Holly Trees are beautiful and long-lived and are an ornamental asset to the property on which they grow. The greatest collection of different Hollies is to be found at Kew Gardens in England, where the "holly walk", begun in 1874, now contains about 120 varieties. In all there are more than 300 species.

HOLLY is the most used symbol of CHRISTMAS!

The most perfect Holly—from every standpoint—is that known as the French Strain of English Holly. It grows faster and twice as high—its foliage is thick, waxy, dark green, lustrous—the berries are in clusters, bright red, abundant, and do not drop off with ordinary handling. That is why we imported this particular type of Holly.

Soon after we imported our trees the Government placed a quarantine on all living trees. It is not likely that anyone else brought this strain of Holly tree into the United States.

The French Strain of English Holly is bisexual and self-fertile, having both male and female blossoms on the same trees. With proper care this type of Holly ALWAYS produces a thick foliage and an abundance of the bright red berries. The foliage is heavy; individual sprays weigh a third more than those of common varieties. These trees grow much faster than ordinary Holly trees. They will grow twice the height in the same period of time.

In times like these we realize that most anything can happen to the best laid plans for future income... ordinary investments may go awry. A comparatively small investment in the French Strain of English Holly,

The BEST for Commercial Purposes, the most BEAUTIFUL for the Garden

where Mother Nature does MOST of the work, will guarantee your income in a few years and you can step out of the harness of routine business or industry.

This is an unusual opportunity for you to control your own investment and income for later years.

Today there is a greater demand for French Strain of English Holly than we can supply. As far as we can ascertain we are the only commercial suppliers of this particularly hardy Holly with its marvelously rich foliage.

In the U. S. Dept. of Agriculture, Farmers' Bulletin No. 1693, issued in October, 1932, it says:

"—only the Dutch, common English, and *Select (French) English* are common in the Northwest. Commercially it cannot be profitable to plant any but the best trees of the *Select* varieties. The blue-stemmed and green-stemmed strains appear to be equally desirable to the trade. The *Select English* trees are vigorous growers, have berries which are large and bright red, and leaves that are **THICK, GLOSSY, CURLY AND DARK GREEN.**"

We paid \$1.00 a foot for OUR TREES in France and we can supply YOU from our own planting stock at this same rate. --\$1.00 per foot f.o.b. Tacoma, Wash.

This photograph shows Hollycroft Gardens Holly cut and boxed ready for the Christmas trade. Picture Holly trees that grow Holly like this on your own property! They will not only add to the appearance of your place, but will ADD TO YOUR INCOME!

A few scenes of Hollycroft Gardens—one of the most beautiful show places of the Puget Sound country. . . . Trees ten feet high bear a crop of Holly Sprays each year of about \$10.00 . . . \$800.00 per acre, and the value of the crop increases \$1.00 per tree a year each year.

HOLLYCROFT GARDENS

F. H. PEYRAN & CO., Nurserymen, Gig Harbor, Washington

Beautify your home and gardens by planting two or three of these gorgeously lustrous trees

EACH TREE WE SELL IS

GUARANTEED !!

WE HAVE NO FAILURES

A Little TIME, a little MONEY, a little WORK... will bring you a handsome return...

For 18 years we have cultivated, advertised, and sold the French Strain of English Holly throughout the United States. The consistent demand for it is greater than we ourselves can supply from our great number of yielding trees. We have systematically reproduced planting stock from the original imported trees by the layering method. We can NOW supply YOU with as many trees as you wish from 1½ to 6 feet in height. We have the only large stock of cultivated French strain of English Holly trees in the United States.

You can Profit from the demand we have created, and assure yourself of substantial, regular income. But you can do this only by planting the best trees.

The French Strain of English Holly is not to be confused with ordinary garden varieties. The common garden varieties are sexual . . . about half of them . . . the female trees . . . produce an abundance of berries, but the berries become soft and drop off during the handling unless they are pollinized by the male trees. Even then, the sprays dry out and the berries shrivel and fall off in shipment.

The thick, waxy, lustrous foliage of the French Strain of English Holly make it the most beautiful for commercial purposes . . . and it has this advantage . . . since holly is sold by weight, and this type weighs a third more than common varieties, you receive more per tree yield.

To insure receipt of the number of trees you want, Order Now. Shipment of your order will be made in advance of the planting time. Complete instructions for planting and cultivation are included with each shipment. Buyers of Holly know our brand. It is in DEMAND. We will tell you how to reach the market.

Order Now!

Put your spare ground to work for you NOW, and it will provide your income in the future. Right now we can supply all you want. We cannot promise an unlimited supply next year, nor for several years to come. All orders are packed to reach you in the best condition.

Begin Today!
